Arithmetic operators in c language Assignment

Q) Write a code in c to show basic arithmetic operation takes two values input from user as a and b integers:

Your output must look like this:

```
enter the value of a:35
enter the value of b:7
35 + 7 = 42
35 - 7 = 28
35 * 7 = 245
35 / 7 = 5
```
