## Self-Made Assignment - HTML Advanced

### Creating Lists

Write two HTML codes for the following two boxes using definition lists.

#### 1. Computer Science Terminology

Algorithm

A step-by-step procedure or formula for solving a problem.

Data Structure

A way of organizing and storing data so that it can be accessed and modified efficiently.

Variable

A symbolic name associated with a value and whose associated value may be changed.

Function

A block of code designed to perform a particular task. Functions can take inputs and return outputs.

Loop

A programming construct that repeats a block of code as long as a specified condition is true.

#### 2. Web Development Terms

HTML

HyperText Markup Language; the standard language for creating webpages and web applications.

CSS

Cascading Style Sheets; a style sheet language used for describing the presentation of a document written in HTML.

JavaScript

A programming language that enables interactive web pages. It is an essential part of web applications.

Responsive Design

An approach to web design that makes web pages render well on a variety of devices and window sizes.
