Highlights from the 2024 International Climate Summit

The 2024 International Climate Summit, held in New York City, has gathered world leaders, scientists, and activists to discuss and forge new agreements on climate action. This year's summit has been notable for its focus on innovative technologies and collaborative global strategies to address climate change.

World leaders and delegates at the opening ceremony of the 2024 International Climate Summit.

Among the key topics discussed were the urgent need for a global carbon tax, advancements in renewable energy technologies, and new initiatives for protecting endangered ecosystems. The summit also featured a series of workshops and panels that highlighted successful climate action projects from around the world.
