Self-Made Assignment - Ms Word

Using Track Changes In Ms Word

Water is a vital natural resource essential for **life on Earth**. It covers about 71% of the planet's surface and is found in oceans, rivers, lakes, and underground reservoirs. Water is not only crucial for human survival but also for **plants, animals, and the environment**. It is used in various processes, such as drinking, agriculture, sanitation, and industry. Water is a versatile substance, existing in three states: liquid, solid **(ice)**, and gas **(vapor)**. The water cycle, which involves **evaporation**, condensation, and precipitation, ensures the continuous movement and distribution of water. Protecting water sources and ensuring its sustainable use are critical for the well-being of future generations. Water has a wide range of uses in daily life and across various industries. **It is primarily used for drinking and cooking**, providing hydration and nourishment to all living organisms. **In agriculture**, water is essential for irrigating crops and sustaining livestock. It is also used in industries for manufacturing, cooling machinery, and processing raw materials. Water plays a key role in sanitation, being used for cleaning, washing, and in sewage treatment.

Using Track Changes

1. Highlighting Life on Earth
2. Delete (ice) and (vapor).
3. Italicize and underline for plants, animals, and the environment
4. Highlighting It is primarily used for drinking and cooking
5. Evaporation:
