Self-Made Assignment - Introduction to C Plus Plus

Basic Syntax and Program Structure In C Plus Plus

Write a C++ program to print following 10 sentences using cout.

1. A computer is a machine that processes data according to a set of instructions.
2. Input devices like the keyboard and mouse allow users to interact with the computer.
3. The CPU (Central Processing Unit) is the brain of the computer, executing instructions.
4. Computers store data in memory, which can be temporary or permanent.
5. Programming languages, like C++, are used to write software for computers.
6. A compiler translates the code written in a high-level language into machine code.
7. In C++, the main() function is the starting point for program execution.
8. Variables are used to store values in a program, and their types are defined at the time of declaration.
9. Conditional statements like if and else are used to control the flow of a program.
10. Loops, such as for and while, are used to repeat a block of code multiple times.
