Self-Made Assignment - C Language

Switch Statement in C Language

1. Write a program in C language checked Vowel or Consonant by using switch statement.

Check if the character matches any of the vowels (a, e, i, o, u). If a match is found, it outputs "Vowel."

If the character is not a vowel but is within the alphabet range, it is a consonant. If it doesn't meet these conditions, it is invalid.
