Self-Made Assignment - Introduction to C Plus Plus

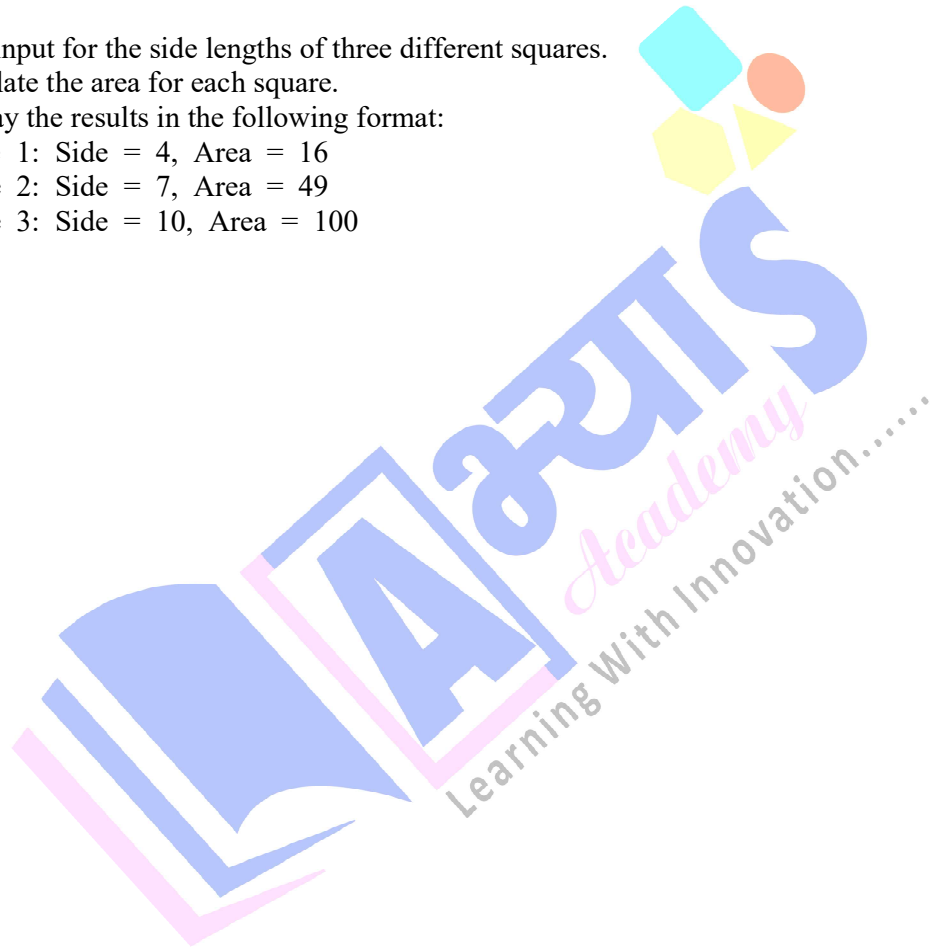

Data Types and Variables in C Plus Plus

1. Write a C++ program that:

1. Declares variables for the length and width of a rectangle.
2. Prompts the user to input the values for length and width.
3. Calculates and prints the area of the rectangle using the formula:
Area = length * width

2. Write a program to calculate the area of three squares:

1. Take input for the side lengths of three different squares.
2. Calculate the area for each square.
3. Display the results in the following format:
Square 1: Side = 4, Area = 16
Square 2: Side = 7, Area = 49
Square 3: Side = 10, Area = 100
