1. Write a program to declare a pointer, assign it the address of an integer variable, and print the value of the integer using the pointer.

Output:

Value of x: 10

2. Write a program to demonstrate pointer arithmetic. Using an integer array, print all elements using a pointer and pointer arithmetic.

Output:

Element 0: 10

Element 1: 20

Element 2: 30

Element 3: 40

Element 4: 50
