Self-Made Assignment - Notepad

Creating Text File in Notepad

Type the Following Text in Notepad

Input Devices:

Input devices allow users to send data to the computer. Examples include:

- **Keyboard:** Used to type text and commands.
- **Mouse:** Used to point, click, and navigate.
- **Scanner:** Converts physical documents into digital format.
- **Microphone:** Records sound for the computer.
- **Webcam:** Captures video and images.

Output Devices:

Output devices allow the computer to communicate information to the user. Examples include:

- **Monitor:** Displays visual output like text and images.
- **Printer:** Produces physical copies of documents.
- **Speakers:** Outputs sound.
- **Headphones:** Personal audio output.
- **Projector:** Displays output on a larger screen.

Summary:

- **Input Devices** allow you to send data to the computer (e.g., keyboard, mouse, and microphone).
- **Output Devices** allow the computer to communicate results to you (e.g., monitor, printer, speakers).

These devices work together to help you use the computer efficiently.
