Make html file and add 2 Paragraphs

The environment refers to the surroundings in which life exists on earth. Components like animals, humans, sunlight, water, trees, and air make up the environment. They are the earth's living and non-living components. Living organisms include trees, humans, and animals. Non-living components such as the sun, water and air are essential for man's life.

Write this first paragraph..Create a class called `.Components` and apply the following styles: Change the background color to `yellow`.Set the text color to `white`..Add 5px of padding around the content.

Air is required for the survival of not just humans but also plants and animals. Without air, there will be no life on Earth. Human beings alone are responsible for the degradation of the environment. The atmosphere, hydrosphere, lithosphere, and biosphere are the different layers that make up the environment. Several gases, like oxygen and nitrogen, that are required for life are found in the atmosphere. The hydrosphere is made up of different water bodies like rivers, oceans, seas, etc.

Write this second paragraph .Create a class called `.programs` and apply the following styles: Change the background color to `green`.Set the text color to `white`.Add 2px of padding around the content.
