Self-Made Assignment - Java Script

Enabling Java Script in Browsers

Question 1 : Rearrange these steps in Correct Order and Enabling Java Script in Internet Explorer.

1. Click OK and come out.
2. Select Security tab from the dialog box.
3. Follow Tools - Internet Options from the menu.
4. Scroll down till you find the Scripting option.
5. Select Enable radio button under Active scripting.
6. Finally, click the Custom Level button.
7. To disable JavaScript support, select the Disable radio button under Active scripting.

Question 2: Rearrange these steps in Correct Order and Enabling Java Script in Firefox.

1. In the search bar, type JavaScript. Enabled.
2. Then you will find the warning dialog. Select "I'll be careful, I promise!"
3. Open a new tab and type about:config in the address bar.
4. There you will find the option to enable or disable JavaScript by right-clicking on the value of that option -> select toggle.
5. Then you will find the list of configure options in the browser.
