Self-Made Assignment - MS Word

Working with Symbols in MS Word

Make this File and Save file with the name "Working With Symbols"

Instructions:-

- Use symbols in this Paragraph.
- Use Font Color and Font Styles as given below paragraph.

"In Linux, the \$ symbol represents the command prompt for regular users, while # is for root users. Commands like `ls -l` (list files) and `cd /home/user/` (change directory) help navigate the file system. Special symbols like `|` (pipe) redirect output between commands, and `>` (greater than) saves output to a file. The wildcard `*` matches multiple files, so `rm *.txt` deletes all `.txt` files. To execute a script, use `./script.sh`, but first, run `chmod +x script.sh` to make it executable!"

**Use Font Color Black With
Font Style Bold.**

Hello @everyone! Have you checked out the latest #trends? It's 100% amazing! Let's meet at 5:30 PM & discuss the project – don't forget your . Also, \$50 is reserved for the team's snacks. If you have any issues, email me at example@email.com ✉. Remember: 'Work hard ≠ No fun!' Stay positive 🌟 & keep learning !"

**Use Font Color Green with
Font Style Italic.**

"Computers are used in various fields like education, business, and healthcare. In offices, MS Excel is used for calculations (`SUM(A1:A10)`) and MS Word for document creation (File > Save As). In programming, languages like C++, Python, and Java use syntax like `if (x > 10) { return true; }`. The internet connects billions of devices via IP addresses (`192.168.1.1`), and websites use `https://` for secure connections. Data is stored in `C:\Users\Documents\` on Windows or `/home/user/` on Linux. Without computers, error: System efficiency not found! ✖"

**Use Font Color Green with
Font Style Underline.**
