&  
Test Series

Self-Made Assignment - Java Script

Introduction to If - Else If Statement in Javascript

**Ques 1: Check if a student has passed or failed based on marks. Using Else If Statement.**

- If the marks are 50 or above, the student has passed.
- If the marks are below 50, the student has failed.

Expected Output:

- For marks = 60 → Status: Passed
- For marks = 45 → Status: Failed

**Ques 2: Determine the category of a person based on age. Using Else If Statement.**

- If the age is less than 13, the person is a "Child".
- If the age is 13 or more but less than 20, the person is a "Teenager".
- If the age is 20 or more but less than 40, the person is a "Young Adult".
- If the age is 40 or more but less than 60, the person is an "Adult".
- If the age is 60 or above, the person is a "Senior".

Expected Output:

- For age = 12 → Category: Child
- For age = 16 → Category: Teenager
- For age = 30 → Category: Young Adult
- For age = 45 → Category: Adult
- For age = 65 → Category: Senior
