Self-Made Assignment - MS Word

Inserting Clipart in MS Word

Wildlife Conservation:

Wildlife conservation is essential for maintaining biodiversity on our planet. Many species are endangered due to habitat destruction, pollution, and climate change. National parks and wildlife sanctuaries help protect animals in their natural habitats. Organizations worldwide work to save species like tigers, elephants, and rhinos from extinction. Planting trees and reducing plastic waste can also help preserve ecosystems. Governments implement laws to prevent illegal hunting and poaching. Zoos and rescue centers play a role in rehabilitating injured or endangered animals. Education and awareness programs encourage people to respect and protect wildlife. Scientists study animal behavior to improve conservation efforts. Every effort counts in ensuring a balanced and healthy environment for future generations.

(Insert different Clipart images of animals like a tiger, elephant, or birds to match the topic.)

Tasks:

**Insert Clipart Images** – Add at least **two** clipart images of animals related to wildlife conservation.

**Apply Picture Styles** – Use the **Picture Format** tab to add effects like **shadows, reflections, or borders**.

**Change Image Shape** – Use the **Crop to Shape** option to change the image shape (e.g., **circle, oval, or star**).

**Use Color Effects** – Apply **Recolor** options to adjust the colors of the clipart images.
