Self-Made Assignment -Java Script

History Object in JavaScript

Tasks:

Task 1: Navigate Back and Forward

Instructions:

1. Create an HTML page with two buttons:
 - "Go Back"
 - "Go Forward"
2. When the user clicks "Go Back", they should navigate to the previous page using `history.back()`.
3. When the user clicks "Go Forward", they should navigate to the next page using `history.forward()`.

Task 2: Display the Length of Browsing History

Instructions:

1. Create an HTML page with a button labeled "Show History Length".
2. When the user clicks the button, display the number of pages in the user's browsing history using `history.length`.

Task 3: Move Back or Forward by a Specific Number of Pages

Instructions:

1. Create an HTML page with two buttons:
 - "Go Back 2 Pages"
 - "Go Forward 2 Pages"
2. Use `history.go(-2)` to move back 2 pages and `history.go(2)` to move forward 2 pages.
