Self-Made Assignment - MS Power Point

Using Slide Master in Power Point

Make this presentation using slide master

 <h1>TECHNOLOGY IN EDUCATION</h1>	<p>Slide 1: Title Slide</p>
<h2>BRIEF INTRODUCTION</h2> <ul style="list-style-type: none"> Use of technology in education is a problematic premise because it has generated a heated debate on whether it helps or hinders learning. Integration of technology in schools has changed today's education and also the way teachers and students use their classrooms. 	<p>Slide 2: Title and Content Slide</p>
<h2>HISTORY</h2>  <ul style="list-style-type: none"> Just a decade ago, teachers used chalkboards, then progressed to white boards and now they are using smart boards. Smart boards are advanced boards which allow teachers to teach and share information with students in a multiplicity of ways. Computers audio-visual capabilities from <i>PowerPoint presentations and other animation software are used to present information in an interactive manner which invites greater interest from the students.</i> Use of projectors, screens and addressing systems (speakers and microphones) allow teachers to teach a large number of students. Studies show that these teaching aids increase concentration levels of students and have led to improvements in student class attendance. 	<p>Slide 3: Title and Content Slide</p>
