Self-Made Assignment - C Language

Conditional Statements in C Language

Task:

Write a C program that checks the temperature entered by the user and displays a message based on how hot or cold it is.

Objective:

1. Ask the user to enter the temperature in degrees Celsius (use float).
2. Use if-else statements to display a message:
 - If temperature is ≥ 35 , display "It's Hot."
 - If temperature is between 20 and 34, display "Weather is Normal."
 - If temperature is less than 20, display "It's Cold."

Output Screen:

Output

```
Enter temperature in Celsius: 33.4
```

```
Temperature: 33.40°C  
Weather is Normal.
```
