Self-Made Assignment - C Language

Two dimensional Array in C Language

Title: Find the Sum of All Elements in a 2D Array

Description:

Write a C program to:

1. Input a 2D array of integers from the user.
2. Calculate the sum of all elements in the array.
3. Display the total sum.

What the Program Should Do:

- Create a 2x3 array: `int arr[2][3];`
- Ask the user to enter 6 numbers.
- Use nested for loops to read input and add all numbers.
- Print the final sum.

What the Program Should Do:

- Create a 2x3 array: `int arr[2][3];`
- Ask the user to enter 6 numbers.
- Use nested for loops to read input and add all numbers.
- Print the final sum.

Output:

```
Output
Enter elements of 2x3 matrix:
2
3
1
3
4
1
Sum of all elements: 14
```
