**Popup Boxes in Javascript**

Write a JavaScript Code that demonstrates the use of popup boxes (alert, prompt, and confirm). The program should:

- Display a welcome message using an alert.
- Ask the user for their name using a prompt and store it in a variable.
- Ask the user to confirm if they want to continue using a confirm box.
- Display the result in the document.write.

**Instruction:-**

You have to write code according to this (previous explanation), and all 4 popup boxes should appear when the code is run in the browser. At the end, whatever we enter in the popup boxes should be shown as output.
