Final Image Size:

- Canvas size: 512 x 512 pixels
- Units: Pixels
- Color Mode: RGB

1. Set up the document

- Open CorelDRAW.
- Go to File > New.
- Name the file: Lotus Flower.
- Set **Units** to Pixels.
- Set the **Width** and **Height** to 512 px.
- Set **Primary color mode** to RGB.
- Click OK.

2. Create Petal Shape

- Use the **Bezier Tool** or **Pen Tool** to draw one petal:
- Make a symmetrical almond shape (like a vertical eye).
- You can create half the petal and mirror it for symmetry:
- Draw the left side → Copy and Mirror Horizontally → Combine both paths.
- Fill: Use a radial gradient from dark red center to light pink/white edge.
- Outline: Add a black outline with a thickness of about 2px.

3. Duplicate and Arrange Petals

- Create 7 petals total:
- Central petal upright.
- 3 on each side, arranged in a curve, gradually tilted.
- Use the **Pick Tool** to select the original petal → Press Ctrl + D to duplicate → Rotate each copy slightly using the **rotation handle**.

4. Layer the Petals

- Adjust **z-order**:
- Center petal in the **front**.
- Side petals should go **behind** it.
- Use Ctrl + Page Up/Down to change layer order.
- Adjust gradient on each petal slightly to create depth.

5. Add Finishing Touches

- Adjust the **gradient feathering** to give soft glow (optional).
- Smooth curves with the **Shape Tool** if needed.
- Group all petals: Ctrl + G.

6. Export Your Design

- Go to File > Export.
- Choose PNG.
- Set size to **512 x 512 pixels**.
- Check **Transparent background** if needed.
- Click **Export**.
