Self-Made Assignment - Java Script

Functions with Conditional Statements in JavaScript

Ques 1-Write a JavaScript Code that asks the user for their age and outputs whether they are a child, teenager, adult, or senior using functions and conditional statements.

Instructions:-

- Create a function called checkAge that:
- Takes one parameter: age.
- Uses conditional statements (if, else if, else) to categorize the age:
- If age is less than 13, return "You are a child."
- If age is between 13 and 19 (inclusive), return "You are a teenager."
- If age is between 20 and 59 (inclusive), return "You are an adult."
- If age is 60 or more, return "You are a senior."

Expected Output Examples:

- Input: 10 → Alert: "You are a child."
- Input: 16 → Alert: "You are a teenager."
- Input: 30 → Alert: "You are an adult."
- Input: 70 → Alert: "You are a senior."
