&  
Test Series

Self-Made Assignment - Java Script

Array object in Javascript

Ques-1 Write a JavaScript program where:

- You create an object called student.
- The student object should have:
  - A name (string)
  - An age (number)
  - A grades property that is an array of numbers (e.g., exam scores).
- Use document.write() to display:
  - The student's name
  - The student's age
  - All the grades (from the array), one by one

output

```
Name: Alice  
Age: 20  
Grades:  
Grade 1: 85  
Grade 2: 90  
Grade 3: 78
```

Ques-2 :- Create a JavaScript program that does the following:

- Create an object called album.
- It should have these properties:
  - albumName: (string) name of the album
  - artist: (string) name of the singer or band
  - songs: (array of strings) names of songs
- Use document.write() to display the album name, artist, and all songs using a loop.

output

**Music Album Details**

```
Album Name: Nature Sounds  
Artist: Calm Music  
Songs:  
1. Morning Breeze  
2. Forest Walk  
3. Night Rain
```
