&  
Test Series

Self-Made Assignment - Python

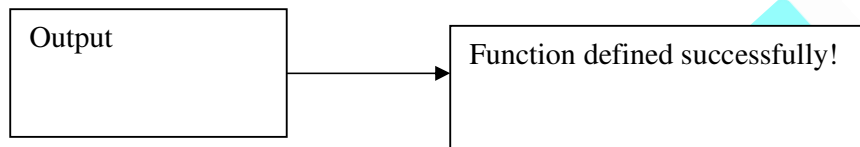

Pass Statement in Python

Ques 1:-Pass in a Function (Placeholder)

Instructions:

Write a Python program that defines a function named calculate\_area().

- Inside the function, write only the pass statement (no logic yet).
- Then, print "Function defined successfully!" outside the function.

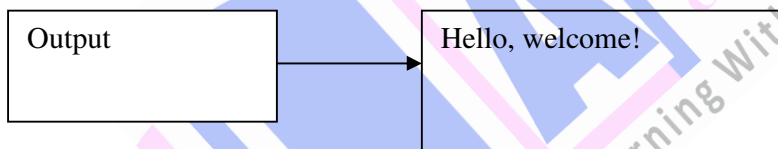

Ques 2:-Pass in an Empty Function for Future Code

Instructions:

Write a Python program that:

- Defines two functions – greet() and farewell().
- In greet(), print "Hello, welcome!".
- In farewell(), use only pass.
- Call both functions.
