Test Series

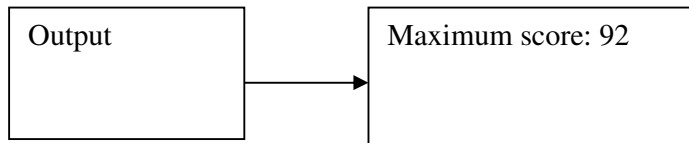

Self-Made Assignment - Python

Scope of Variables

Ques 1:- Find Maximum in Global List

Instructions:

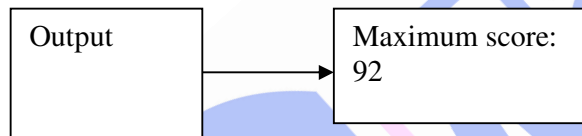

1. Create a global list scores = [45, 78, 92, 55, 60].
2. Write a function find_max() that finds and prints the maximum score using global.

Ques 2:- Conditional Toggle of Global Flag

Instructions:

1. Create a global variable flag = False.
2. Write a function toggle_if_true(x) that sets flag = True only if x > 10 using global.
3. Call the function with different values and print flag after each call.
