Self Made Assignment - DHTML

Float Property in CSS

Ques: 1 Write a CSS program to Design a horizontal navigation menu using the float property.

Instruction (step by step)

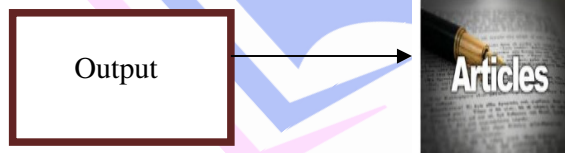

- Create an unordered list (ul) with menu items (li).
- Remove the default list bullets.
- Apply float: left to each list item.
- Add padding and background color to make it look like a menu.
- Keep the menu items in a single row.

Ques: 2 Create a news article where the image is on the left and the text flows on the right.

Instruction (step by step)

- Add one image.
- Add a long paragraph.
- Float the image to the left.
- Add space between image and text.

This is a news article.
The image is on the left side and the text flows around it.
Float property helps to wrap text around images like newspapers.
