DCS+ (1532) RollNo)

Ans 1. (i) Diligence :- A Computer can perform millions of tasks or calculation with the same consistency ~~and~~ accuracy.

(ii) Versatility :- The Computer can perform more than one task at the one time.

Ans 2. (i) A Computer works with ~~the~~ higher speed more than human. or  $\pi$  calculation of accuracy ~~is~~ बहुत fast करता है.

(ii) feelingless :- Computer एक feeling less मशीन है, ~~or यह मनुष्य के मुकाबले ज्यादा काम कर सकता है, बिना रुके, बिना थके,~~

(iii) Accuracy :- Accuracy works with Computer in 100% Accuracy.

Ans 5. (i) Input functions :-

(ii) Output functions :-

(iii) Storage functions :-

(iv) process functions :-

Input functions :- We use the input function to take input from the user. If functions used for enter as input the input function into a Convert in string.

(ii) Output :- An output function is a function that an optimize function calls at each iteration of its algorithm. or  $\mathbb{R}^n \rightarrow \mathbb{R}^1$

(iii) Storage :- An storage function is use for store all data of Computer. Image, files, doc. etc.
